## Burley Production Way Down in 2016

As I type this coming back to the office from a few days away for the Christmas Holiday, I realize the end of the year is near. By the time you read my next column it will indeed be 2017 and we can be talking about 2016 in the past. As with any year there are good and bad times to talk about. I am sure for some 2016 will hold special times and memories, but some will look back and be glad it is in the past.

For tobacco producers, 2016 will not be a year that is looked back at with a smile. Tobacco production has been in decline for the biggest part of two decades, with only a few good years sprinkled in here and there. The biggest problem for producers has been a declining demand. Some of that is because there are fewer using tobacco, or it sure appears that way to me. It seems odd to see someone light up a smoke these days. However, demand will not be the only thing that producers look at for 2016 with a sour taste. The weather in 2016 was really poor for tobacco production. The following describes the 2016 tobacco season very well. It was in a recent tobacco newsletter that I receive. It indicates just how poor the yields for 2016 appear to be.

Tremendous mid-season rains followed by a dry curing season crippled yields. Most reliable sources say that USDA's last estimate of burley production was way too high at 143 million pounds. Estimates of 110 to 120 million pounds have been suggested, but Rankin doubts it will reach as high as 100 million. "This may be the shortest burley crop ever," he says.

## Farmer's Tax Guides

Typically we have the printed version of the Farmer's Tax Guides available in early December. I normally pick these up while on campus for training that has been held the second week in December for the past few years, but this year they were not yet available. At this time, I am told we should see them soon, but not yet.

I will let you know when these become available. Hopefully it will be soon.

## Tobacco Museum Fundraiser

Last week I wrote about the Tobacco Museum Fundraiser scheduled for April 8 in Ripley. Tickets are available now. I did receive a few calls and request for tickets in recent days. If you would like more information you can read my previous columns on our website at <http://adams.osu.edu> or you can go to Brown or Highland by substituting the county name into the link.

## Dates to Remember

January 9 Pesticide testing at noon, Old Y Restaurant, every month, second Monday.

January 12 Small Farm College in Owensville.

January 17 Ohio Beef School starts at

7:00 p.m. Plan is for two

**THE OHIO STATE UNIVERSITY**

COLLEGE OF FOOD, AGRICULTURAL,  
AND ENVIRONMENTAL SCIENCES

CFAES provides research and extension programs to clientele on a nondiscriminatory basis. For more information: [go.osu.edu/cfaesdiversity](http://go.osu.edu/cfaesdiversity).

locations with one being confirmed as Hillsboro HS Agriculture classroom. The second location is TBD.

There are 2 additional dates of Feb. 7 and Feb. 28, same locations and time.
